DIGICULUM

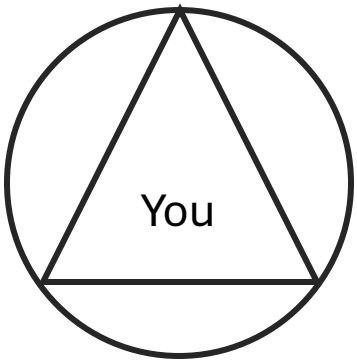
AI Practitioner Bootcamp

Start your Personalized Continuous Collaborative AI Reskilling Journey

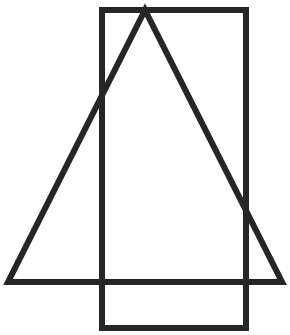
- 21 Days
- Live Learning
- Practical Application

Who is an
AI Practitioner?

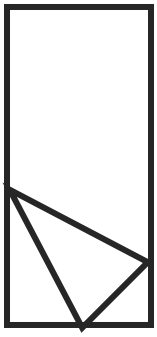
An **AI Practitioner** proactively reskills to AI to stay relevant and competitive, either in his/her current role or a new AI role.



Your Job



AI changes your job making you uncomfortable and irrelevant



You step out of your comfort zone, become an **AI Practitioner** and adapt to the new work environment

Increase your
AIQ

Beyond IQ and EQ, the tomorrow's workforce demands **AIQ — the AI Quotient,** built on three pillars: Know, Hack, and Build

The **AI Practitioner Bootcamp** curriculum is based on **Know-Hack-Build** model

Know

Understand core AI concepts, trends, and use cases

Hack

VITA (video, image, text, audio) using AI tools in your daily tasks

Build

Create practical AI apps that improve your work and give you an edge

AI Practitioner Bootcamp

For Individuals

Technical, Non-Technical or Absolute Beginners

21 Days
Cohort-based

Live Learning
Online Instructor-led

Practical Application
Coaching + Ecosystem

What you will Learn

Know

AI Fundamentals

- What type of technology is AI?
- Correlation between AI, IT, and Digital transformation
- Key enablers of AI
- Different types of AI

Generative AI

- Building blocks of GenAI
- GenAI use cases
- LLM evolution
- How GPT was trained
- Prompt engineering

Agentic AI

- Core capabilities of AI agents
- Business essentials of AI agents
- Evaluation of AI agents

Technical Concepts

- Machine learning (ML)
- ML model output evaluation
- Computer vision
- Natural language processing
- Neural networks
- Deep learning
- Vectorization and embeddings
- Self-Attention mechanism
- Transformer architectures
- Diffusion models
- Supervised, unsupervised, and reinforcement learning algorithms
- Pretraining LLMs
- Fine-tuning techniques
- Retrieval-Augmented Generation (RAG)

Hack

Video

- Turn text or slides into short videos
- Break long videos into short important clips
- Derive insights from videos
- Capture key images from videos
- Build your AI clone

Text

- Create, summarize, augment a given text
- Auto-generate emails
- Rewrite content for different social media platforms
- Analyze sentiment and tone in a written message
- Developing ideation for projects

Image

- Creating photo-realistic, artistic, abstract, anime, design, and concept visualization images
- Enhancing images through variations
- Explain concepts and insights via infographics
- Inpainting
- Outpainting

Audio

- Create your own music
- Audio and speech enhancement
- Voice cloning
- Convert voice into structured text
- Talk to your Apps

Build

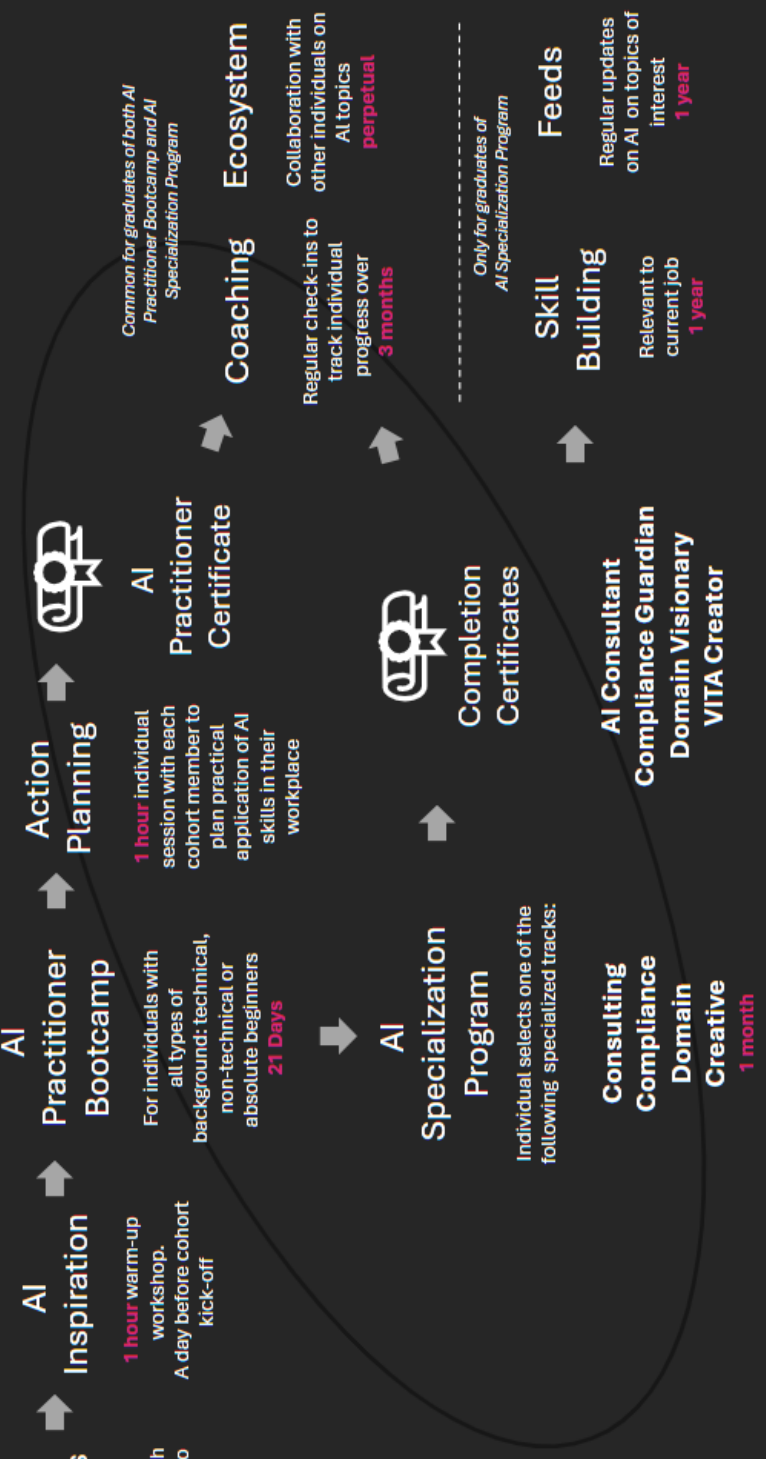
AI as your Interviewer

- Trained to simulate real interview rounds for your target roles, industries, and seniority levels.
- Ask you high-quality questions, probe deeper based on your answers, and give structured feedback on clarity, confidence, and impact.
- You can use it to practice consistently, sharpen your storytelling, and enter interviews with a clear advantage
- It will help you perform better, negotiate stronger, and accelerate career growth.

AI Practitioner Bootcamp

is an important stop in your

Personalized Continuous Collaborative AI Reskilling Journey



AI Reskilling Journey Explained

1:1 Interviews

This is the first step after you enroll in the AI Practitioner Bootcamp. It is a 30-minute online interview with each of the cohort members.
This step helps us understand your current situation, past experiences, and future aspirations related to AI.

It marks the beginning of your **personalized** learning journey, customized specific to your career goals.

AI Inspiration

This is the second step in your journey; a 1-hour alignment and kickoff prep session held one day before the cohort begins.
It includes a 45-minute presentation followed by 15 minutes of Q&A.

The goal is to bring everyone onto the same page by clarifying core AI fundamentals in simple, practical terms, while also building excitement for what's ahead.

Because AI terminology is still evolving and many concepts are used inconsistently, we focus on clear, easy-to-understand definitions so the entire cohort shares a common foundation.

We also address "Myth vs. Reality"—breaking common misconceptions and giving participants a grounded, realistic view of AI.
This warm-up session sets the right expectations for the 21-day AI Practitioner Bootcamp and secures a clear commitment from participants before the program begins.

AI Reskilling Journey Explained

AI Practitioner Bootcamp

The table below shows the 21-day schedule:

Week 1

Day	Know	Hack	Build
1	AI definition, Correlation between IT DT and AI, Key enablers, Different types	H1# Create, augment, summarize text H2# Sentiment detection	
2	GenAI, VITA use cases, LLM Evolution, Prompt Engineering	H3# Image creation H4# Image enhancement	
3	Prompt Engineering, Prompting in OpenAI Playground	H5# Inpainting H6# Outpainting	
4	GenAI building blocks, use cases, How GPT was trained	H7# Infographics H8# Generate slides	
5	AI Agents definition, Core capabilities	H9# Rewrite content for different social media platforms H10# Develop ideation for projects	
6	AI Agents building blocks, business essentials, use cases, multi-agent system (MAS)	H11# Auto-generate emails H12# Auto-marketing using AI	
7		Buffer day	

AI Reskilling Journey Explained

AI Practitioner Bootcamp

The table below shows the 21-day schedule:

Week 2

Day	Know	Hack	Build
8	Who is who in AI World	H13# Text to video H14# Generate slides	
9	AI Multi-industry impact	H15# Video to clips H16# Video to images	
10	Evaluating VITA	H17# Derive insights from videos H18# Voice to text H19# Talk to your apps	
11	Multimodal LLMs, Diffusion	H20# Clone your voice H21# Create your music H22# Enhance audio and speech	B1# Build AI Clone
12			B1# (continued)
13			B2# Video-making using AI
14		Buffer day	

AI Reskilling Journey Explained

AI Practitioner Bootcamp

The table below shows the 21-day schedule:

Week 3

Day	Know	Hack	Build
15	Machine Learning ML Output evaluation	H23# Intro to Vibe Coding	
16	Deep Learning, Computer Vision Natural Language Processing, Neural Networks, Vectorization and Embedding,	H24# Workflows using n8n	
17	Transformer Architectures, Fine-tuning, RAG, Self-attention mechanism	H24# continued	
18			B3# AI as your interviewer
19			B3# Continued
20			B3# Continued
21	Bootcamp Wrap-up		

A few online self-paced videos shall be provided to the cohort members as additional references

AI Reskilling Journey Explained

Action Planning

After the AI Practitioner Bootcamp concludes, each cohort member participates in a **1-hour p**ersonalized Action Planning session. In this one-to-one meeting, we translate newly acquired AI skills into a practical, workplace-focused plan, identifying real use cases, prioritizing opportunities, and defining clear next steps to drive immediate impact.

AI Practitioner Certificate

The AI Practitioner Certificate is awarded to participants who successfully complete the program. The certification remains valid for **three years**, recognizing your demonstrated capability to apply AI responsibly and effectively in real-world business contexts.

Key benefits of the certification include:

- Credible proof of your AI skills and practical readiness
- Stronger professional profile and career differentiation
- Increased confidence to lead AI initiatives in your organization
- Recognition of your commitment to continuous upskilling in a rapidly evolving field

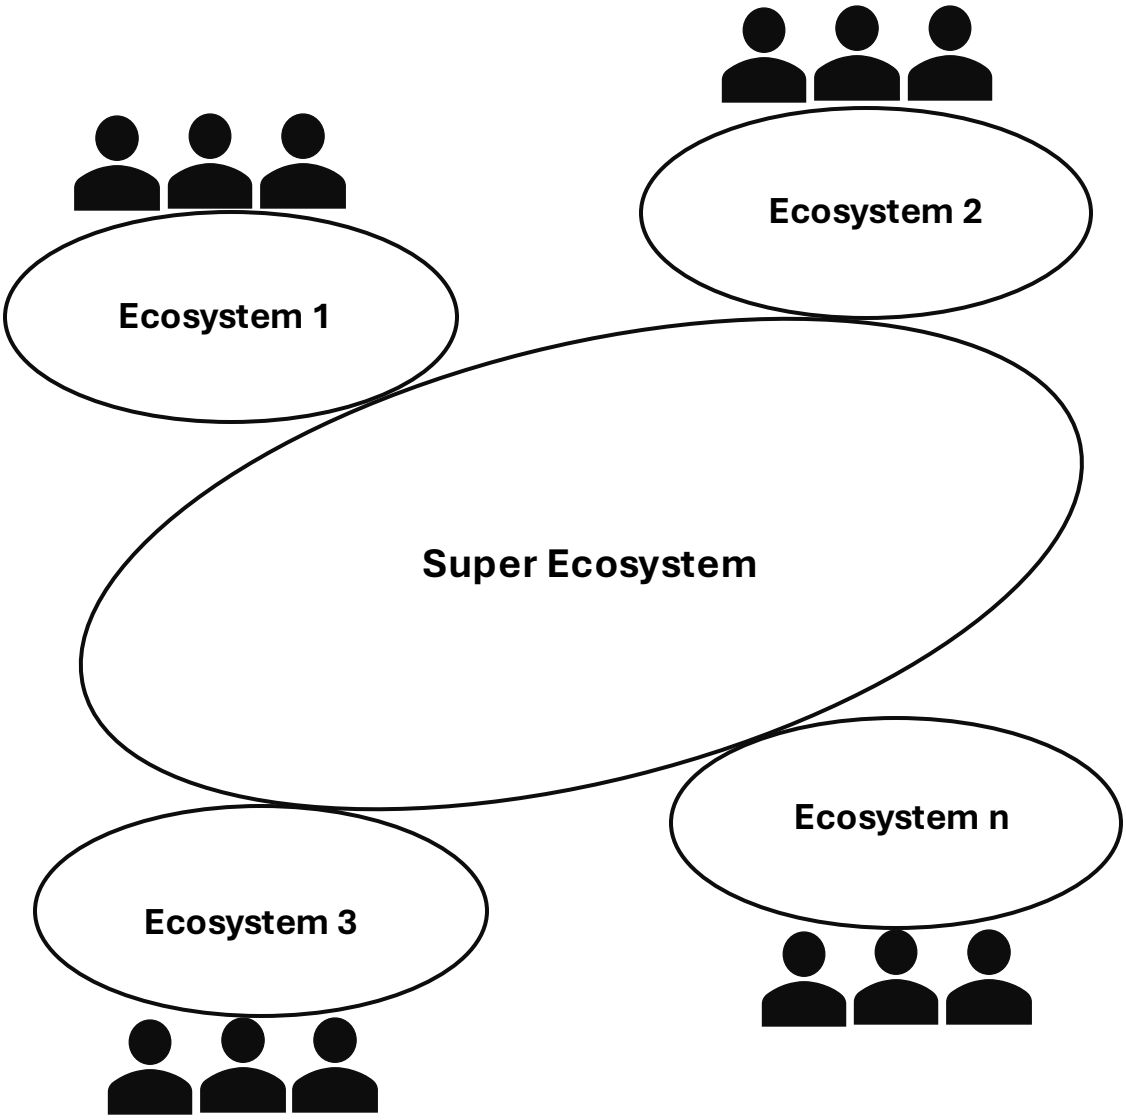
Coaching

Following the 1-hour Action Planning session, cohort members receive **three months** of ongoing coaching. During this period, we continuously track progress, provide guidance, and help you overcome real-world challenges as you apply AI in your work. This ensures momentum is sustained and your learning translates into measurable outcomes.

AI Reskilling Journey Explained

Ecosystem

Alongside coaching, cohort members are enrolled into our **AI Ecosystem**, a collaborative community where professionals share knowledge, skills, and best practices around specific AI topics. This community supports the collaborative dimension of your personalized and continuous AI reskilling journey.



AI Reskilling Journey Explained

Each member can subscribe to one AI topic ecosystem at no cost, with the option to join additional ecosystems for a fee. Members across different ecosystems are connected through a Super Ecosystem, creating a powerful network for cross-domain learning and collaboration.

What you get inside the ecosystem:

- Curated updates on the AI topics
- Real use-cases and playbooks shared by members
- Peer support which includes feedback and troubleshooting from the community
- Best practices & responsible AI guidance to avoid costly mistakes
- Momentum and accountability to keep progressing beyond the program

AI Reskilling Journey Explained

AI Specialization Program

As a next step to the 21-day AI Practitioner Bootcamp, an individual has an option to enroll in a **1-month** AI Specialization Program. This program helps you turn the general AI skills and capabilities into job-specific advantage. The program currently includes four specialization tracks: Consulting, Compliance, Domain, and Creative.

Consulting: This track is for technical, management, or strategy consultants who aspire to become AI consultants.
After completion, an individual will be able to:

- Consult clients on why they need to invest in AI
- Conduct an AI evaluation study
- Support clients at all stages of AI adoption: early , intermediate and scaled adoption
- Prepare a business case for scaled adoption
- Automate processes and workflows using AI tools to achieve productivity gains
- Implement AI at workplace

Compliance: This track is for those who want to pursue careers in AI auditing, risk management, or data and AI compliance.
After completion, an individual will be able to:

- Select the right AI audit framework
- Conduct an AI Audit at client site
- Evaluate AI risks and vulnerabilities and suggest appropriate measures
- Develop compliance policy for clients in accordance with local regulations
- Apply the responsible AI framework at workplace

AI Reskilling Journey Explained

Domain: This track is for specialized professionals in finance, healthcare, legal, HR, accounting, pharma, and more who want to leverage AI in their respective fields.
After completion, an individual will be able to:

- Perform AI impact analysis at industry level
- Identify AI use cases relevant to the domain
- Use AI to automate processes and workflows
- Build AI projects such as apps, agents, or co-pilots
- Be a domain visionary able to lead your industry with vision and best AI practices

Creative: This track is for creatives such as artists, UX designers, fashion and interior designers, and filmmakers who want to combine their craft with the power of AI.
After completion, an individual will be able to:

- Perform VITA (video, image, text, audio) analysis
- Identify right AI tools for each VITA component
- Implement appropriate VITA solutions
- Strike the right AI-human balance combining the best of both
- Achieve productivity gain at workplace

At the completion of the program, there will be coaching for 3 months, enrollment into ecosystem, on-the-job AI skill building as per requirement, and continuous feeds and updates on latest related AI development.

More information on the specialization tracks to be provided soon.
